(By Associated Press.)

WASHINGTON, August 5.—Senator Lewis, the Democratic whip, replied to the Senate today to an attack made on the administration by C. E. Hughes in his nomination acceptance speech.

The Republican strictures on the administration Mexican policy, Lewis denounced as "treasonable" and charged that the clause in the Republican platform favoring interference with the internal affairs of Mexico was responsible for the massacre of troops at Carrizal.

"Not until the captains of the Republican party shot at the president of the United States did Mexican outlaws shoot at the soldiers of the American president," he said.

The platform declaration Lewis characterized as a "summons to Carranza and Villa to revenge the entrance of American soldiers into Mexico and the interference of Americans with her internal affairs."

"It was the Republican convention that slew the soldiers at Carrizal," Lewis declared vehemently.

Senator Fall, Republican, said he would like to spend every cent of the Republican campaign funds to mail Lewis' address over the country. "I have just listened to the most remarkable harangue like which I never did hear on the stump and which I never expected to hear in the halls of Congress. To reply would be to dignify it," said Fall.

## NEW MACHINERY FOR GIPSY QUEEN

### PUMP, HOIST AND COMPRESSOR TO BE USED IN SINKING SHAFT

A campaign of development has been undertaken by the Gypsy Queen Mining company which entails the installation of about a carload of machinery, a portion of which is already at the mine and the balance has been delivered at the depot.

The shaft is now 1470 feet deep and will be sent down a great distance, the exact footage not being yet given out, but will be determined by the water flow and the formation. At all events, a station will be cut at the 1500 foot point and a crosscut run to the vein which was encountered in the shaft below the 1200, which was picked up in a crosscut on the 1350 and followed in a winze from that level on a clearly defined body of commercial ore, until the miners were driven out by water.

The new installation includes a semi-Diesel internal combustion fuel oil engine of the latest pattern. It has a capacity of 50 horsepower with a very moderate combustion of fuel. In fact, it is said to be one of the cheapest powers possibly obtained in a desert region. The engine was purchased through and is being installed by Campbell & Kelly. This engine will be used to drive the new compressor. The latter machine is now at the depot and will be taken to the mine tomorrow. It is capable of delivering 350 cubic feet of compressed air a minute to the drills. It cannot be exactly computed how many drills can be run with this machine, because compression is more difficult here than at sea level, but the management expects to get service for about six drills.

In addition there is installed a three drill, electrically driven compressor which may be used as an auxiliary or put in commission if there should be any stoppage of the big machine.

A new pump was lowered into the shaft today. It will be set up in the 1350 station, below which the water is being held by a baler. The pump has a capacity of 75 gallons a minute and will be an auxiliary to the 55 horsepower pump already installed. In addition the company is putting in a No. 5 Cameron sinker, it already having a No. 3 Deane sinker. A new 75 horsepower motor is being installed in the hoist house and a 35 horsepower motor for the new pump, the old pump having been operated by a 25 horsepower motor.

## STUDENTS REVOLT IN NIPPON SCHOOL

### PUPILS BY THE THOUSAND ARE EXPULSED TO KEEP ORDER IN ORIENTAL EMPIRE

(By Associated Press.)

Tokio, August 5.—Strikes of pupils against their teachers constitute a feature of modern Japan which is giving the educational authorities considerable concern. Previously peaceful revolts of students were confined to the medical schools, but lately they have extended to the middle schools, which correspond to the high schools of the United States. The strikes are usually due to the pupils' objection to the transfer of a favorite teacher or to their dislike of a new teacher. Ordinarily the incident is closed up by the temporary suspension of the students. This makes them surrender, as they fear dismissal which would ruin their careers in business or professional life.

A recent strike occurred in Takao, northern Japan, where all the fourth and fifth year students, numbering more than 200, went on a strike because they were not satisfied with the head master.

## GEN. BRUSSIOFF WAS REAL DANDY

### SOCIAL FAVORITE DEVELOPS INTO MOST ACCOMPLISHED LEADER OF WAR

(By Associated Press.)

PETROGRAD, August 5.—Gen. Alexis Brussloff, commander of the Russian army which swept through Bukovina, was little known outside of Russia before the present war. In fact, it was not until 1914 that he was given command of an army corps. His work in the war won him promotions. He is almost the only one of the many prominent social figures in the army who has made good.

Gen. Brussloff is 63 years old, but looks more like 45. He is alert and modern. He has dark, steady, searching eyes and nose with a high, commanding curved bridge, and a square jaw. His hair is close cropped; he wears a long thin grey moustache.

It was Gen. Brussloff who commanded an army in the first Carpathian campaign when the Russians were ready to pour down into Hungary, but were forced to retreat for lack of ammunition. Unlike many Russian generals, Brussloff had the advantages of an excellent education and began army life in a fashionable cavalry regiment. Ability and influence combined to make his advancement rapid. He held many positions, was recognized a favorite at court, distinguished himself as a daring rider, encouraged cavalry officers to go in for polo and cross country steeplechases and was popular in Petrograd society. Then came the war to try out the capacity and character of men. Brussloff was one of the studious, professional type of officer who came to the front and made good.

The Socialists went on record as favoring fusion with the I. W. W. and approving a strike meeting of that organization.

## BRITISH PUBLIC FALL FOR FAKE CHARITIES

(By Associated Press.)

LONDON, August 5.—London society has been stirred by the revelation that some of its titled and most prominent members have unwittingly been lending their names to fraudulent war charity organizations.

Following close on the heels of the report the founder of a war fund was arrested, speedily convicted and sentenced to six months' imprisonment at hard labor for converting its money to his own use. In passing sentence the court condemned widely known persons who had allowed their names to be used on "dummy committees."

Rumors that all was not straight in the affairs of many of the "charity" organizations which have sprung up since the outbreak of the war were heard early this year and resulted in the appointment of the committee. The report, for instance, refers to one charity that published no accounts, to another with a merely nominal committee, to a third whose balance sheets failed to account for a quarter of a million dollars, to a fourth started by an undischarged bankrupt, to a fifth that was the invention of a foreign swindler. To all these the public gave freely.

"The favorite dodge," says the report, "is really to expend the major part of the sum collected on the nominal object of the charity and only steal twenty or thirty thousand pounds."

(By Associated Press.)

WASHINGTON, August 5.—The value of manufactures in the United States was \$24,246,000,000 in 1914, the Census bureau reports. This shows an increased value of 17.3 per cent since 1909.
